DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by DeBetencourt et al. (U.S. 6,279,001).

DeBetencourt et al. discloses a method delivering content from a plurality of sources to a plurality of end servers through a central manager, the method comprising:

- receiving the content from the plurality of sources at the central manager; (90)
- formatting the content (http) to a form usable by the plurality of end servers; (102) creating a transaction generic to the plurality of end servers, the transaction including a reference to a set of instructions for storing the formatted content; (col.2, lines1-4)
- sending the transaction to an end server in the plurality of end servers, wherein the transaction allows the end server to execute the set of instructions by calling the reference if the formatted content is desired by the end server, the set of instructions storing the formatted content into the memory of the end server. (fig.3; col.4, lines 19-54; col.5, line 58-col.6, line 43)

- sending the stored formatted content to a plurality of clients. (col.8, line 64-col.9, line 44)
- storing the transaction in a storage device. (106)
- wherein the storage device is a cache. (106; col.8, line 64-col.9, line 44)
- determining if the transaction is current. (abstract; col.3, line 41-col.4, line 5; col.10, line 62-col.11, line 5)
- wherein determining if the transaction is current comprises reading a flag indicating the transaction is not current. (col.7, lines 27-50)
- requesting prior transactions from the storage when the transaction is not current; and receiving the prior transactions from the storage. (col.7, lines 27-50)

Response to Arguments

3. Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.
